**Technologies:** Angular, Spring Framework, React, Flask, Github, Flutter.

## WORK EXPERIENCE

---

**Enxenio** A Coruña  
*Part time full stack developer* Feb 2022 – Mar 2023

- Contributed to the development of three full stack web applications, including one for an international company.
- Started a project from scratch on my internship, developing key functionalities in less than 3 months.
- Collaborated with a small team of 4 developers to work on a big project.
- Utilized Java, Spring, and Angular to build robust, scalable applications.

## PROJECTS

---

### Galegando21

- Master's Final Project.
- Mobile app development using Kotlin aimed at promoting the Galician language.
- Organized a closed testing phase with over 30 participants.
- Developed 21 mini-games and integrated gamification elements to enhance user engagement.

### BeFiter

- Social media app focused on physical exercise, developed using Kotlin.
- Positive feedback received for the app's detailed concept and high-quality execution.

### Degree Final Project

- Software to enable students and teachers to practice Spanish speaking.
- Successfully implemented speech recognition and assessment features.

### Hackathon HackUDC – Electrodatos Wrapped

- Interactive visualizer of electricity consumption.
- Collaborated in a team of 4 to develop the project within a 2-day timeframe.
- Presented the project at Inditex offices, receiving positive feedback from industry professionals.

### Information Retrieval App

- Web app for an information retrieval software focused on clothing.
- Designed and implemented key search functionalities to improve information retrieval accuracy.

## ADDITIONAL INFORMATION
